## BIKE TO BIKE INTERCOM INTERCOM CONFERENCE MODE: UP TO 4 BIKERS

### Description

INTERPHONE OFF ROAD was developed to meet the ever-growing need of off-road motorcyclists to communicate with each other over long distances and in situations that are often impassable or difficult because of the nature of the terrain and the demanding environmental conditions encountered on a motorcycle. By communicating unexpected obstacles or difficult sections of road to other motorcyclists, riders can usually avoid unexpected dangerous situations, and prompt action can be taken in an emergency. INTERPHONE OFF ROAD is a Bluetooth® headset that's designed to be simple and reliable. It's equipped with important standard functions that are essential to motorcyclists who love biking off road and on all kinds of terrain.

### New features\*

- INTERCOM AUTO RECONNECTION - If your intercom friend goes out of range while having an intercom conversation, INTERPHONE OFF ROAD automatically tries to reconnect the intercom.
